

Little Bird MH-6 and AH-6 Fully Destructible Helicopter

To use, install via the package manager (**window < package manager < my assets**)

Prefabs with destructible and non-destructible versions for every color (green, black, tan) and version (MH-6 & AH-6)

All doors, controls, and switches have properly set pivot points - make sure your workspace is set to **Pivot & Local** when selecting the door “parent” or switch/control

The instrument panel is set up as a simple canvas - each needle/marker is a separate image within each gauge parent, so they can be edited to work with your personal flight controller (not included). Extra gauges are located in the “gauges” folder.

Please feel free to ask questions or make asset store requests -
